**HOME INSTALLATION:**

Owner to provide an entrance to the site approved by the mover before the move is to begin.
The home will not be scheduled for delivery until Owner has provided temporary power and VPH has completed the foundation, basement floor, and backfill.
Ideally the grade should be 24” below the top and graded level about 30’ out and 60’ along the unloading side of the foundation.
**Standard Garage Specifications**

If applicable

All framing and structural materials will be in accordance with all Building codes and the appropriate local municipal inspections department. Any addendum pages may change scope of these specifications.

**STRUCTURAL:**

2x4 exterior walls with 7/16" sheathing. (studs @ 16" on center)
Engineered 4/12 pitch roof trusses @ 24" on center with 1/2" sheathing.
2x4 treated mud sill plate.

**INSULATION:**

Sill sealer between sill plate and foundation wall.

**SHINGLES:**

35 year, 110 MPH architectural asphalt shingle - weathered wood only.
Synthetic roofing underlayment.

**EXTERIOR FINISHES:**

LP Smartside lap siding – limited color selections.
White perforated soffit.
White fascia and metal roof edging.
White 6" band boards at base of house and garage.
White 4" window and door trim boards.
White 4” outside corner boards.
Match siding 6” vertical trim boards.

**GARAGE ELECTRICAL:**

One centered interior porcelain light fixtures.
Two GFCI outlets inside garage.
One exterior wall mounted light fixture on garage pillar on front door side only.

**DRYWALL:**

5/8" type X fire code drywall installed on all party walls that separate the house and garage. Type X drywall installed on garage ceilings if required by plan design and layout.

**OVERHEAD GARAGE DOOR:**

One white steel insulated 16’x7’ overhead garage door with glass in top row.
garage door opener included.
**Standard Site Prep Specifications**

All site work will be done in accordance with all Building Codes and the appropriate local municipal inspections departments. Addendum page may change scope of these specifications.

**HOUSE SITE PREP**

**Foundation:** Basements: are 8" X 96" poured concrete. A 2x4 framed furred wall with R-19 Batt insulation and foil wrap installed around the inside perimeter of the foundation. Crawl spaces: are 8" X 24" poured concrete walls on 16"x18" poured concrete footings with a minimum R-7.5 Foam panel insulation installed on the interior side of footings and walls (minimum length of 4'-0"). Drywall installed over exposed insulation panels.

**Waterproof:** Basement foundation walls will be water-proofed with black bituminous tar.

**Egress Window:** One 48" x 48" glider window installed wall within 44" of the finished floor where required in basement foundations. (not included in crawl space foundations)

**Drain Tile:** Basement foundations only: Form-A-Drain system installed around the interior and exterior of the footings, terminating in a sump pit. (not included in crawl space foundations) Egress window wells will have drains extending down to the drain tile.

**Sump Pump:** All basements shall have an automated switched sump pump installed into the drain tile pit that is plumbed with a discharge pipe to the exterior of the home. (not included in crawl space foundations)

**Grading/Backfill:** Foundation will be backfilled with available dirt from excavation then water soaked for settlement. Area around home will be rough graded to an area extending 75' around home. City style lots of less than 12,000 square feet will be rough graded complete. If extra dirt is required, it will be at the owner's expense.

**Sand & Gravel:** Aggregate material required as under slab fill, plumbing rough in, and drain tile installation.

**Basement Floor:** 4" concrete slab poured over a level layer of granular fill layer. Slab to be sawn or hand tooled with expansion joints.

**Driveway & Approach:** When required, a 4" thick concrete slab with 6" X 6" wire mesh extended from a public roadway to the front of the garage or back of parking area. (extra charge)
Patio: 10'x10'x4” concrete slab with 6' X 6” wire mesh doweled into foundation wall where abutting and sloped away from foundation.

Private Walk: 42” wide concrete walk 4” thick extending from parking area to front door.

City Walk: When required, typically 4’ x 4” concrete slab running along public right-of-way as required by some jurisdictions. (extra charge)

Curb Cut: On lots that have a curb installed along the edge of pavement, the curb would be ground down to street level for the installation of the approach and driveway as listed previously. (extra charge)

Gutters: 5” seamless gutters installed on roof edge with 4” rectangular downspouts and minimum 2’ extension.

Patio Steps: Swing doors: treated wood landing and steps to concrete patio.
Sliding doors: treated wood steps to concrete patio.

Basement Drains and Water line connection: PVC drains installed under the basement floor slab to accommodate the addition of a ¾ bath installation. A centrally located floor drain installed. (not included in crawl space foundations)
Connect water line circuit to owners’ pressure system.

Final Clean: Home is cleaned as appropriate for occupancy: including (but not limited to) floors, windows, fixtures, walls, cabinets and tops, basement and garage.

Porta Potty: Required for all workers to complete construction of the home.

GARAGE SITE PREP

Foundation: 6” Poured concrete walls. Footer depth will be designed to meet local code requirements.

Garage Floor: 4” Concrete slab with 6” x 6” wire mesh doweled into foundation around perimeter.

Parking Pad: 4” concrete slab with 6” x 6” wire mesh as per dimension specified, sloped for drainage installed in front of garage

PORCH SITE PREP

Foundation: Footer will be designed to meet local code requirements.

Porch Floor: Treated wood deck with wood steps.
